

Product information

H₂Pro[®] Maximise

1
MONTH

Itemcode:16667

PRODUCT DESCRIPTION

Scotts H₂Pro Maximise is a penetrant wetting agent for moving water away from the soil surface and down the soil profile. The product can reduce surface water and puddling, encourage deep rooting to help with drought management and help to flush excess salts down soil profile.

PRODUCT DESCRIPTION

1. Significantly reduces irrigation requirements.
2. Moves water down through soil profile to encourage deeper rooting.
3. Effective through the rootzone and not just at the surface.
4. Excellent spreading and penetration characteristics.
5. Flexible application programmes and flexible water rates.

PRODUCT CHARACTERISTICS

Pack size:	10 L
Application rate:	40 L/Ha
Water volume:	250-500 L/Ha
Pack coverage:	2500 m ²

STORAGE

Keep away from heat and sources of ignition. Keep away from food, drink and animal feeding stuffs. For quality reasons: Keep out of reach of direct sunlight, store under dry conditions, partly used bags should be closed well. Keep at temperatures between 0 °C and 40 °C.

DIRECTIONS FOR USE

- Best performance achieved when applied in a programmed approach.
- Apply Maximise when surface water and puddling is an issue, especially during winter months. Continue applications through the winter at 8 week intervals.
- Application can be made with a standard boom sprayer. A powered irrigation injection unit or calibrated professional hose diluter may also be used to apply Scotts H₂Pro Maximise.
- Watering-in after application will aid penetration of wetting agent into the soil and improve efficacy.
- Penetration of the wetting agent and be further enhanced if applied following aeration programmes such as hollow tining, slitting and/or scarification.

HEALTH & SAFETY

A Material Safety Data Sheet is available on request.

SPRAYER ADVICE

Spray quality	Size of droplets	Retention on leaf surface	Potential drift hazard*	Recommendation
Very fine	Fine	Good	High	x
Fine		Good	↑	x
Medium		Good		✓
Coarse		Moderate		✓
Very coarse	Coarse	Poor	Very low	✓✓

* Spray drift can be minimized by using TurfMark Extra.
