

PHLEX-MAN

FOLIAR MANGANESE SUPPLEMENT

Phlex-Man is a liquid foliar product designed for use on turf where tests have confirmed a lower desirable concentration of manganese. Foliar applications will provide immediately available manganese to the plant especially when applied with our **Carbon Power** products to enhance:

- **Stress Resistance**
- **Color**
- **Enzymatic Functions**

Manganese, which is typically low in golf course soils, is critical to stress tolerance. Manganese plays a central role in several reactions required for synthesis of phenolic compounds used for defense mechanisms.

PROFESSIONAL USE GUIDELINES

③

NUTRIENT CONTENT

Sulphuric Trioxide (SO₃) water-soluble 5,0%
or Sulphur (S) water-soluble 2,0%
 Manganese (Mn) water-soluble 5,0%

Net Weight: 1,147 kg/L

Rate of Application: 2,5 to 5 litres per hectare every 14 days.
