

Chewings fescue

To improve there is a need for evolution...

Dark attractive colour

In the range of Chewings fescues available DARWIN is definitely amongst the darker coloured - this can be the decisive trait for choosing this variety depending on mixing partners and local preferences.

High summer wear tolerance

The wear tolerance of DARWIN is very good especially in the summer allowing play and use of even ornamental type lawns.

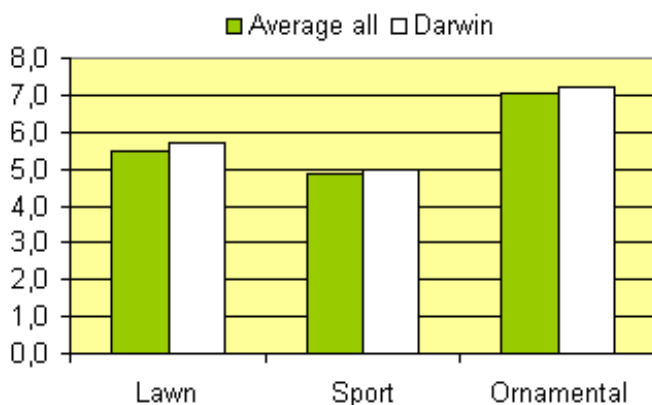

Easy establishment

Red fescues are not the fastest to establish but DARWIN is amongst the better performing.

In the charts below DARWIN is compared to the average of all varieties on the French list 2007.1

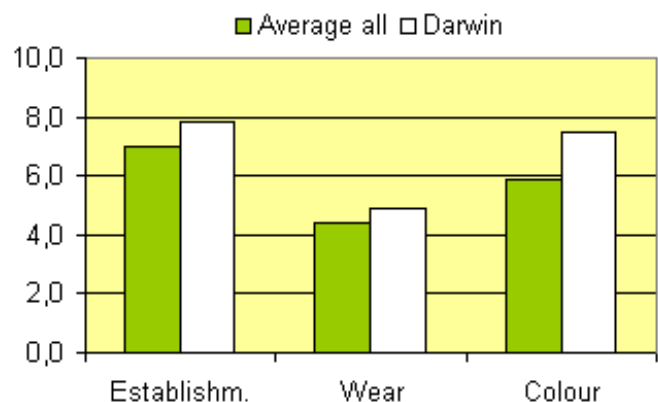

- Amongst the darkest Chewings fescues
- Very good wear tolerance
- Easy fast establishment
- High shoot density
